

15' Lightning Bug Options

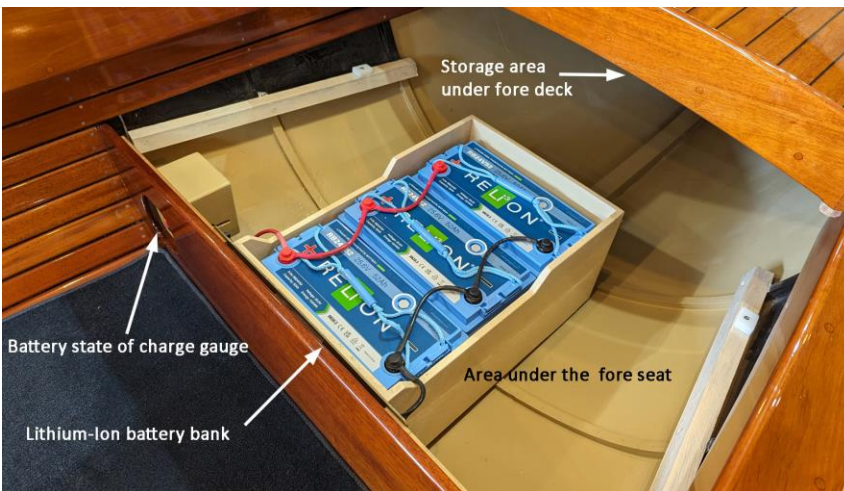

Built-in aft deck cooler: \$720

An insulated cooler installed under the aft deck, accessed by a hatch neatly cut from the mahogany deck so the wood grain runs consistently through. Perfect for entertaining—it holds approximately two bags of ice and eight to twelve drinks and is large enough to accommodate tall wine bottles. Water runs out an overboard drain—so there's no need to empty ice. This is our most popular option.

Ice box closed

Extended range Lithium batteries: \$1,700

Our standard lead-acid AGM battery bank will run the boat for 3 ½ -5 hours, depending on speed. This option doubles that running time. In most cases the standard bank does fine, but if you live on a larger body of water, or might have multiple outings a day, then we recommend the Lithium-ion option.

Note: The standard batteries are located in the same space, there are just two AGM batteries instead of the three lithium shown here. All the batteries have the same case size, but the lithium option weighs 34% (49 lbs) less.

Canopy top: \$2,350

For that "Turn of the Century" look. A nine-foot long canopy of Sunbrella fabric with a wood framework and mahogany poles. One person can install it in less than five minutes—has an overhead courtesy and running lights built in.

Top drops down for travel

Full keel protection for running gear

Standard running gear without full keel

Stereo system: \$950

A hidden six-speaker system designed to surround you with sound while at the same time not distract from the classic look of the Lightning Bug's interior. A remote volume control is located next to the driver's controls.

Music comes from an I-pod or phone which is plugged into a cord stored behind the aft seat. (we can also set up for Bluetooth instead)

All the electronics for the stereo system are located on the boat's control panel neatly hidden under the aft deck.

Mahogany folding table: \$690

A small folding table for drinks or hors d'oeuvres. It can easily be removed and stored under the fore deck. The mahogany table includes a cushioned cloth storage bag.

Teak folding table: \$610

The same size and style as our varnished mahogany table but is constructed of oiled teak.

Gold leaf (23 carat) lettering in name: \$320

Hand applied by a local craftsman. A hand painted name is included with the boat price, we only charge extra if gold leaf is requested. Please look on our website for a gallery of different names we've done.

Hand-knotted soft cotton fenders: \$150 per 2

Classic knotted 4" diameter fenders. The craftsmanship which goes into these fenders is impressive.

(Vinyl fenders are also available: \$45 per 2)

We also offer a variety of custom fit covers, a custom fit trailer and a few other items not shown on this sheet. Please contact us for further details.
